

- 1 Work in pairs. Look at the pictures and talk with your friend about the animals in Glacier National Park. Start your questions like this: *How tall ... ? How heavy ... ? How long ... ? How fast ... ? How big ... ?*

Example:

A: *How tall is the black bear?*

B: *It is 3 feet tall.*

			
3 feet (0,9 m) 210–315 pounds (95–143 kg) 15–20 years	3 1/2 feet (1 m) 216–717 pounds (98–325 kg) 15–20 years	2,000 pounds 30 miles (48.270 km) per hour 12–15 years	more than 7 feet 1,000 pounds 45 miles per hour 20 years

- 2 Read and say why you would like to visit Glacier National Park.

### Glacier National Park

Glacier is a special place. The mountains, forests, lakes and **grasslands** provide home for many different animals. Grizzly bears, wolves, moose, deer, mice and squirrels are just a few of the animals that live there. It is also a place where, every summer, thousands of visitors come to see the mountains, take pictures and hike trails.

There is also a special programme for children there. They can become a Glacier National Park Junior **Ranger**. It is really pretty easy. Children of 6 – 12 year old have to do the activities in the special newspaper. They can get their parents, older brothers and sisters or another **adult** to help them if they want. They can also ask a Park Ranger for help if they get stuck on any of the activities. Then children **return** the newspaper to the Visitor Information Centre, give the Junior Ranger **Pledge** and get there a Glacier Park Junior Ranger badge. Children usually have fun learning about Glacier National Park.
